EXPERIENCE

TRRev Technology (OPC) Private Limited-Thane   **Jan 2023 - April 2024**
Web Developer

 As a skilled full-stack developer, I have extensive experience in building robust applications using the Laravel framework. My expertise spans both front-end and back-end development, allowing me to create seamless and efficient user experiences. I am adept at crafting APIs that support project requirements and enhance overall functionality. Throughout my career, I have consistently thrived in collaborative team settings while also demonstrating the ability to excel independently on projects. My strong problem-solving skills and commitment to delivering high-quality work have been instrumental in driving successful project outcomes.

PROJECTS

- WABPAY - An online platform accommodating four user roles for property uploads and access to admin portals. Property management, profile updates, and self-promotion are facilitated. Property listings are subject to superadmin approval, who also has the capability to upload properties.
- HRX - A global job portal convergence for candidates, employees, and agencies. Seamless job posting by employers and a crucial role for agencies in confirming and facilitating listings. A collaborative platform for a comprehensive, streamlined experience, enabling effortless candidate applications for diverse job opportunities.
- APS - An application that caters to three distinct roles: admin, field officer, and security guard. It streamlines attendance marking, site management, and issue reporting. Field officers oversee multiple sites and assign security guards, who can report issues using geofencing. The app also generates location-based QR codes for efficient attendance tracking, highlighting a comprehensive approach to system functionality and user experience.
- JustAcademy - This is an all-encompassing online learning platform where admin can assign delegate module management responsibilities to executives. The platform facilitates course creation, administration, category organization, SEO-friendly meta content, and uploading images and PDFs. It also includes program management capabilities and a user-friendly interface for showcasing trending courses and programs. An intuitive website serves as a gateway for user engagement.
